

Webinar to introduce a higher education course on Inclusive Green Economy (IGE) Modelling

Thursday, 19 November 2020, 9.00-10.30am GMT

[Register here!](#)

1 Why Join this Webinar?

Are you a university lecturer, professor or educator interested in running a course on inclusive green economy (IGE) modelling? This webinar will present a package of teaching materials for a semester-long course that was developed under the Partnership for Action on Green Economy (PAGE) and is now freely available to higher education institutions around the world. The materials were pilot-tested in spring 2020 at the Universidad de Pacifico, Peru (online). They are available in English and will be translated to Spanish and French over the next couple of months.

Join the discussion on 19 November to learn more about the package and Peru's experience! We look forward to exploring opportunities for replicating the course at other universities/higher education institutions. By the way, if you aren't planning to establish a full new course, you can also choose to integrate components of the package into your existing course portfolio or use components of the course for a series of seminars.

2 Agenda

9.00am	Welcome and Tour de Table	Cecilia Kinuthia-Njenga, Head, UNEP Office in South Africa
9.10am	Opening remarks: The importance of teaching IGE modelling	Ronal Gainza, PAGE Secretariat
